The full-lifecycle solution for RTI/I&RS... From early stage pilots to fully mature RTI/I&RS models, RTIm Direct scales and evolves with district's implementation of RTI/I&RS

Whether you are in the early stages of implementing RTI/ I&RS or have a fully mature model, RTIm Direct saves time, reduces paperwork, enables data-driven decision making, improves collaboration and communication, and enhances quality ...

Assess the Population and Aggregate Data:

- Seamlessly compatible with any and all assessments/curriculum-based measurements (CBMs)
- Assessment/CBM data can be automatically imported in a batch or entered individually

Identify Struggling Learners and Assign Intervention Tiers:

- Automatically performs comprehensive statistical analysis and helps calculate cut-scores
- Automatically identifies students in need of an intervention
- Automatically suggests a specific intervention tier

Develop Student Interventions:

- Guides staff through the process of creating intervention plans in the least time possible
- Allows intervention plans to be drafted directly online for viewing, editing, and collaborating
- Provides a library of optional and editable "starter text" to assist in drafting interventions
- Maintains a comprehensive K-12 record of each student's entire intervention history

Provide and Track Interventions:

- Allows the logging of intervention session date and duration to be recorded
- Enables notes regarding intervention session activity and student observations
- Provides instant online access to each student's intervention session activities, log, and notes

Monitor Progress and Manage Tiers:

- Automatically creates charts which include target score, actual score, and estimated score
- Automatically flags students that are non-responsive
- Seamlessly compatible with any and all curriculum-based measurement probes / assessments
- Assessment/CBM data can be imported in a batch automatically or entered individually

Communicate with Parents:

- Generates personalized parent notices quickly and easily as a batch or individually
- Produces high-quality and comprehensive RTI progress reports
- Includes a comprehensive library of customizable parent communication documents
- Allows districts to add their own letters to the system

Continuously Monitor, Query and Analyze Data:

- Allows data to be quickly and easily monitored and queried with a few keystrokes and mouse clicks
- Eliminates additional data entry – NO redundant data entry
- Includes a fast and easy tool for generating administrative reports, queries, and listings
- Allows authorized users to design and produce highly customized ad-hoc reports and listings
- Offers a library of reports and listings to increase efficiency, and support best practices
